EIGHTH ANNUAL REPORT  
OF THE  
Board of Public Utility Commissioners  
OF THE  
Province of Alberta, 1923.

---

TO THE HONOURABLE HERBERT GREENFIELD,  
*Chairman of the Executive Council of Alberta,*  
EDMONTON, ALBERTA.

SIR,—

In accordance with the requirements of the Statute, the Board of Public Utility Commissioners has the honour to submit its report for the year just closed.

At the last Session of the Legislature *The Public Utilities Act* of 1915 was repealed, and *The Public Utilities Act, 1923*, was enacted, this Act coming into effect on July 1st, 1923. The new Act very considerably increased the scope of the Board's work. *The Municipal Finances Commission Act* was repealed, and its provisions incorporated in *The Public Utilities Act, 1923*, thus transferring the work of the Municipal Finances Commission to the Board. *The Taxation Revision Act* was also repealed, the work of the Commissioners appointed under that Act being taken over by the Board.

Under the former Public Utilities Act, the period covered by the Board's Annual Report was for the year ending on the thirtieth day of November of the calendar year just ended. The new Act, however, provides for the report covering the full year, consequently the present report will cover the period from December 1st, 1922, to December 31st, 1923.

During this period a number of changes have occurred in the personnel of the Board. On the first day of December, 1922, Mr. E. J. Fream was appointed a member of the Board. On May 1st last, Mr. G. H. V. Bulyea resigned his position as Chairman of the Board, owing to ill health. On November 1st last, Mr. A. A. Carpenter, a member of the Board since its inception, was appointed Chairman.

During the year the long-standing dispute between the City of Calgary and the Canadian Western Natural Gas, Light, Heat & Power Company, Limited, was, at least for the time being, brought to a close, the city finally submitting to the Board's rate fixing decision of October 22nd, 1921. As the period covered by this decision expires on November 1st of this present year, the Board will undoubtedly have the matter before it in the near future. The North Western Utilities, Limited, the company which has taken over the assets and undertakings of the Northern Alberta Natural Gas Development Company, Limited, during the period under discussion, completed its pipe line from its well in the Viking Field to the City of Edmonton, and the company is now supplying that city with natural gas,

in accordance with the terms of the Board's decision of last year. A number of applications in connection with the granting of franchises to this company by towns and villages along the company's pipe line were dealt with during the year.

An application was made by the City of Red Deer for a revision of the rates charged by the Western General Electric Company, Limited, in the City of Red Deer. The application is still pending, owing to the company appealing to the Appellate Court on the question of the Board's jurisdiction to deal with the matter.

Summaries of other matters relating to public utilities, and coming before the Board during the year, are set out as specified by the Act.

Municipal borrowings during the period under discussion were less than for the previous year. Borrowings by cities have been almost entirely confined to the refunding of older issues. Debenture issues by school districts, apart from one comparatively large issue by one of the cities, were considerably less than in the previous year. During the year considerable time was given by the Board to the question of the extension of the sinking fund payments of the City of Calgary, under the special legislation of 1922.

As already indicated, the work formerly carried on by the Municipal Finances Commission has now been transferred to this Board. This work involves a close supervision of the expenditures of all municipalities that have been brought under the provisions of *The Municipal Finances Act*, or under the substituted provisions of *The Public Utilities Act, 1923*. A summary of the matters of this nature dealt with by the Board appear in the following pages.

There has been a very great increase in the number of cancellation applications dealt with by the Board. No less than one hundred and sixty-five orders cancelling subdivision plans were made during the course of the year. This increase is partly, but only partly, due to the Board having taken over the work formerly carried on by Commissioners under *The Taxation Revision Act*, now repealed.

Certificates granted under *The Sale of Shares Act* were somewhat less in number than in the previous year. A recent decision of the Supreme Court of Canada has held that companies incorporated under Dominion Charter are beyond the operation of the provincial Sale of Shares Act. This is a matter for regret, for it will undoubtedly have a tendency to lead promoters of doubtful propositions to seek Dominion incorporation so that their operations in regard to the selling of shares in the province may be almost wholly without check.

Summaries of all other matters dealt with by the Board appear in the report.

Respectfully submitted,

(Signed) A. A. CARPENTER,  
Chairman.

(Signed) E. J. FREAM,  
Commissioner.

January 30th, 1924.  
EDMONTON, ALBERTA.

## MISCELLANEOUS APPLICATIONS

---

December 18, 1922. File No. A. 34.

Re Alberta & Great Waterways Railway Company and Lacombe and North Western Railway Company. Application under Section 201 of the Alberta Railway Act (now Section 207, Chapter 48, R.S.A.) for a report to the Lieutenant Governor in Council upon the General Train and Interlocking Rules of the A. & G. W. and L. & N. W. Railway Companies.

Report made in accordance with the terms of Section 201 above mentioned, recommending approval.

---

February 15, 1923. Order No. 2183A. File No. 241.

Re Okotoks Electric Company, Limited, and Town of Okotoks.

Order made authorising a revision of the rates chargeable by the Company in accordance with the agreement arrived at between the company and the town.

---

April 11, 1923. Order No. 2248. File No. 2127.

Application by the Village of Lloydminster and William Johnson and Edward Thomas Johnson for approval of the granting of a franchise by the Village of Lloydminster to the parties above named for supplying electric light and power to the village and its inhabitants.

Order made.

---

May 19, 1923. Order No. 2297. File No. 2876.

Application by Department of Indian Affairs for an order of the Board, under subsection 6 of Section 109 of The Public Utilities Act, directing the Registrar of Land Titles at Edmonton to register the subdivision plan of "Ma-Me-O Beach."

Order made.

---

June 9, 1923. Order No. 2322. File No. 2508.

Application of the Canadian Western Power & Fuel Co., Ltd., for authority to issue \$200,000.00 of bonds, in accordance with the terms of the trust deed filed.

Order of approval granted.

---

July 6, 1923. Order No. 2349. File No. 2742.

Application of the Northern Alberta Natural Gas & Development Co., Ltd., and the North Western Utilities, Limited, for—

1. Approval of the transfer to the North Western Utilities, Limited, of the assets and undertakings of the first named company;
2. Approval of a bond issue and mortgage by the North Western Utilities, Limited, for \$4,000,000, of which no greater amount than \$3,250,000 shall be disposed of without further permission of this Board;
3. Approval of the sale of certain of the capital stock of the North Western Utilities, Limited, to the Canadian Utilities, Limited.

Order approving granted, subject to the undertakings of the North Western Utilities, Limited, contained therein.

---

July 11, 1923. Order No. 2353. File No. 84.

Application by the North Western Utilities, Limited, for approval of an agreement between the company and the Town of Tofield whereby the Town of Tofield grants the company a franchise for a period of ten years for the supply of natural gas to the town.

Approval granted.

July 13, 1923. Order No. 2354. File No. 2742.

Application of the North Western Utilities, Limited, for the Board's approval of the map of the company's main pipe line and lines connecting its gas wells with the City of Edmonton.

Order of approval granted.

---

July 13, 1923. Order No. 2359. File No. 33.

Application by the North Western Utilities, Limited, and the Village of Viking for approval of an agreement between the company and the village whereby the village grants to the company a franchise for a period of ten years for the supply of natural gas to the village and its inhabitants.

Contract approved.

---

July 19, 1923. Order No. 2362. File No. 2742.

Application of the North Western Utilities, Limited, for approval of the plan and book of reference of a portion of its main pipe line.

Order of approval granted.

---

July 31, 1923. Order No. 2387. File No. 33.

Application by North Western Utilities, Limited, for approval of the location of its gas pipe lines and distributing system in the Village of Viking.

Order made.

---

August 1, 1923. Order No. 2395. File No. 2742.

Application of North Western Utilities, Limited, for approval of the plan and book of reference of part of the main pipe line of the company.

Order of approval made.

---

August 8, 1923. Order No. 2407. File No. 110.

Application by the City of Calgary, in accordance with the provisions of subsection 56 of Section 117 of the Calgary Charter, for approval of a contract entered into between the City of Calgary and the Calgary Power Company, Limited, for the supply to the city of electric power.

Contract approved.

---

August 14, 1923. Order No. 2416. File No. 146.

Application by the Village of Holden for approval of an agreement made between the Village of Holden and the North Western Utilities, Limited, whereby the village grants to the company a franchise for a period of ten years, for the supply of natural gas to the village.

Application granted.

---

August 24, 1923. Order No. 2430. File No. 114A.

Application by the Union Power Company, Limited, for the Board's approval of the transfer of the assets of the Drumheller Power Company, Limited, to the applicant company.

Order approving of transfer made subject to conditions set out therein.

---

August 28, 1923. Order No. 2431. File No. 2910.

Application by the Village of Ryley and the North Western Utilities, Limited, for approval of an agreement made between the company and the village whereby the village grants to the company a franchise for a period of ten years for the supply of natural gas to the village and its inhabitants.

Contract approved.

August 28, 1923. Order No. 2434. File No. 2742.

Application of the North Western Utilities, Limited, for authority to vary the rates chargeable for natural gas in the City of Edmonton for domestic purposes and for a definition of the term "industrial consumers."

Ordered that the rate for domestic gas in the City of Edmonton be reduced from 46½c per 1,000 c.ft. as follows:

- (1) For the first 60,000 c.ft. per month—no reduction.  
For the next 20,000 c.ft. per month—40c per 1,000 cubic feet.  
For the next 20,000 c.ft. per month—35c per 1,000 cubic feet.  
For all in excess of 100,000 c.ft. per month—30c per 1,000 cubic feet.
- (2) That "industrial consumers" shall mean and include those consuming natural gas in manufacturing and industrial plants and for the generating of power.

---

August 31, 1923. Order No. 2443. File No. 2742.

Order defining the term "domestic consumer" when applied to the rate or price charged by the North Western Utilities, Limited, in the City of Edmonton.

The term "domestic consumer" when applied to the rate or price chargeable by the North Western Utilities, Limited, shall mean all consumers other than those coming within the term "industrial consumer," as defined by Order No. 2434.

---

November 21, 1923. Order No. 2598. File No. 20.

Order varying Order No. 1505B., being an order of the Board of Public Utility Commissioners fixing the boundaries of the inner and outer zones of the City of Edmonton.

---

November 24, 1923. Order No. 2589. File No. 20.

Application by the City of Edmonton under subsection 7 of Section 221 of the Edmonton Charter for approval of Bylaw No. 35, 1923, being a bylaw prescribing the space to be left vacant about buildings, to limit the number and nature of buildings to be erected on any lot or parcel of land within certain parts of the city, to declare certain streets or parts thereof to be residential streets and to prescribe the distance from the line of the street in front of and at the side of it at which no building on a residential street may be placed or erected.

Approval granted.

---

December 26, 1923. File No. 97.

Application by the City of Lethbridge for an order of the Board restraining the Canadian Western Natural Gas, Light, Heat and Power Co., Limited, from shutting off the gas supply from the City of Lethbridge and its inhabitants.

Hearing fixed for January 3, 1924, at the Court House, Calgary.

---

December 26, 1923. File No. 2969.

Application by the Canadian Western Natural Gas, Light, Heat and Power Co., Limited, for an order of the Board authorising the company to increase the rates chargeable by the company to consumers of natural gas in the City of Lethbridge.

Hearing fixed for January 3, 1924, at Court House, Calgary.

MISCELLANEOUS APPLICATIONS WITHDRAWN, OR NOT PROCEEDED  
WITH BY APPLICANTS.

Town of Nanton	Gas Supply.	Withdrawn.
Village of Cayley	Electric light franchise.	Not proceeded with.
City of Calgary and Canadian Western Natural Gas, Light, Heat and Power Co., Ltd.	Approval of agreement.	Not proceeded with.

MISCELLANEOUS APPLICATIONS PENDING AT DECEMBER 31, 1923.

Town of Coleman	Extension of watermains.	Pending.
Village of Mannville	Electric franchise agreement.	Pending.
City of Red Deer	Reduction of electric light, power rates, etc.	Pending.
City of Lethbridge	Complaint against Canadian Western Natural Gas, Light, Heat and Power Co.	Pending.
Canadian Western Natural Gas, Light, Heat and Power Co.	For order fixing rates.	Pending.

IN THE MATTER OF *THE MUNICIPAL HOSPITALS ACT*  
and

In the matter of an appeal by twenty-five ratepayers of the Town of Hanna against the amount apportioned to the said town for the year 1923 for hospital taxes.

This is an appeal, under the provisions of *The Municipal Hospitals Act*, by twenty-five ratepayers of the Town of Hanna against the fixing of the sum of \$3,500 by the Hospital Board, as the amount required as the town's share of the total hospital levy for the current year.

The Municipal Hospital District of Hanna No. 9 was organised and the scheme thereof voted upon in 1919. The amount estimated to be required to be raised by taxation for the first year's operation of the hospital was shown in this scheme as \$24,877.75 of which \$2,688 was apportioned to the Town of Hanna and \$250 to each of the Villages of Craigmyle and Richdale. The balance of the total required was made up by assessing the land in each of the rural units at a flat rate of 3c per acre.

The hospital was completed and opened on August 1st of last year. No taxes were levied in 1919, but in 1920, even before construction of the hospital, the board of trustees made a revision of the amounts to be levied upon the various units, the variation mainly being that in place of \$2,688 an amount of \$4,035 was demanded from the Town of Hanna. On appeal under section 29 of the then *Municipal Hospitals Act*, the Board of Public Utility Commissioners restored the original apportionment, on the ground that the apportionment set out in the original scheme was not lightly to be disregarded, and there was no evidence to warrant the hospital board at that stage, in making any such variation in the apportionment. In 1921, the 1920 apportionment was adopted, but in 1922 slight increases were made in the allotments made to the urban units. The Town of Hanna was asked in that year to contribute \$3,000, and slight increases were made in the amounts to be contributed by the Villages of Craigmyle and Richdale. No appeal was made against this variation owing, it is stated by the town, to the fact that the town was not aware of the amendment of 1922 to *The Municipal Hospitals Act*, now Section 17 of Chapter 116, R.S.A., which fixes the minimum amount which must be paid by an urban taxpayer before that taxpayer may receive hospital services at the minimum rate.

The total amount apportioned amongst the various units in 1918 and also in 1920 was \$24,877.73. In 1923 the amount asked for was increased to \$26,283.11, or \$1,405.38 greater than the amount asked for in 1920. Of this increase the Town of Hanna bears an amount of \$812, making a total allotment of \$3,500, and the allotments to the Villages of Craigmyle and Richdale were increased in all by \$123.23, the balance of \$471.25 being distributed amongst the various other units. It appears, however, that the rate of taxation required to be imposed upon the rural units is no greater than the previous rate, the variation being caused by an adjustment of the assessable acreage in the different rural units. As indicated before, the amount apportioned to the Town of Hanna is \$3,500, in place of \$2,688 as set out in the original scheme. The Village of Craigmyle is asked for \$365.88 in place of \$250, and the Village of Richdale \$257.23 in place of \$250.

Two preliminary objections were raised by counsel for the trustees, one that the notice of appeal does not contain the grounds upon which the appellants rely and the other that the notice of appeal was not served upon the other contributing units. Neither of these objections, in the Board's view, should be given any

weight. The Act does not specify that the reasons should be set out in the appeal, and in an appeal of this nature the main reason is generally that the division is deemed to be unfair. Further, where the original apportionment is varied, the reasons that induce the hospital board to make the variation may be unknown by the appellant, and the burden of justifying the change would appear to be as much upon the Hospital Board as the burden of setting out reasons would lie upon the appellants. Furthermore, the hospital district cannot possibly have been prejudiced in this case by the lack of the town setting out its grounds of appeal in the notice.

As to the other objection, that the notice of appeal was not served upon the various municipalities which, or portions of which, compose the hospital district, it may be pointed out that there are no provisions in *The Municipal Hospitals Act* requiring service of notice upon these different municipalities. The section relating to an appeal in such case simply sets out that twenty-five ratepayers of a contributing unit may appeal to the Board of Public Utility Commissioners. A copy of the notice of appeal was served upon the Hospital Board, which is composed of representatives of each contributing unit. It would certainly entail a great hardship upon the town if the Board held that failure to serve notice upon each contributing unit or municipality, when no such requirement is set out in the Act, had cut it out of its right to appeal. Counsel for the hospital district mentions Section 72 of the old *Public Utilities Act*, which provides that no order involving any delay, loss or deprivation to the proprietor of any public utility or to any municipality shall be made without due notice and full opportunity to all parties concerned to be heard. This section was clearly intended to govern proceedings in regard to public utility matters, and not such a matter as the one in question. The re-enacting section of *The Public Utility Act of 1923*, Section 86, occurs in the part of that Act relating to public utilities, and not in the part relating to general procedure. While the Board does not desire to indicate that service of notice of appeal would not be advisable in some instances, it is not willing to deprive a unit of its right to appeal simply because such procedure had not been followed, particularly as the Board, in case it felt that notice should be given, might enlarge the hearing until all the units were notified. In this particular case the Board has before it all the evidence, at least all the evidence that can be considered material, that it may be reasonably expected any particular unit or all of the individual units can offer. Representation by the individual units in this instance, therefore, cannot bring any new light upon the question, and the Board is clearly of the opinion that this objection of the hospital board should not deprive the town of its right to appeal.

Dealing with the other questions raised by the appeal, it may be said that the hospital board seeks to justify its variation of the town's share of the total levy, by endeavoring to show that the town derives proportionately greater benefits from the hospital than do the rural units. Counsel for the district produces figures showing the number of patients coming from the town as compared with the number of rural patients, the number of hospital days for town and rural patients, respectively, and the population of the urban as compared with the rural units. He figures out that from August 1st, 1922, when the hospital was first opened, to May 31st of the present year, the number of Hanna patients was 23% of the total number. On this basis the assessment of the town would be \$5,809.18. From August 1, 1922, to May 31, 1923, the number of hospital days of Hanna patients was 17% of the total number of hospital days, and if the assessment were based on the relative number of hospital days, the town assessment would be \$4,213.81. Again he takes the population, and taking the town's population at 1,700 he finds that on the basis of population the town would have to pay \$6,846.18. If equal weight were given to all these elements, he further estimates that the

town levy should be \$5,623.06. Finally he adopts one more method of arriving at what the town should be expected to pay by giving equal weight to the population, number of patients, patient days, and property values, and figures that the town assessment should be \$4,795.34.

The contention of the town on the other hand is that not only should the amount of the demand made upon the town for the present year be reduced, but that there should be a complete revision of the allotments made amongst the various units based upon assessment values alone.

No general principle of assessment is laid down in *The Municipal Hospitals Act*. Hospital districts practically always comprise a number of urban units in addition to the rural units, and it is apparent that the framers of the Act realized the difficulty of arriving at any general basis of assessment that would be acceptable to both classes of units. In urban units there is a different standard of assessment for municipal purposes that is set out for municipal districts under *The Municipal Districts Act*. Cities, towns and villages in this province have found, in many instances, that it is necessary to tax improvements or to impose a business tax, in order to obtain sufficient revenue to enable them to carry on. The municipal districts on the other hand, assess land only, exclusive of improvements. When comparing the assessment of the urban units with the rural units it is necessary to bear in mind this feature. It was also apparently realized that if the basis of fixing the demand was arrived at by taking into consideration the assessed values alone, the rural units would feel that the urban units, by reason of their relatively small assessments and large population as compared with rural units, would receive the benefits of hospital services on much more favorable terms than the rural units. The question, therefore, as to the amount to be contributed by the urban and rural units was, in the main, left to be arrived at by agreement. But as circumstances might change from time to time, it was felt that some power of re-adjustment of the apportionment made upon the various units must be given, and the hospital board were given this power, subject on appeal, to the final decision of the Board. However, the more the Board has considered the Act as a whole, the more strongly is it convinced that it was not intended to place upon the trustees, and eventually upon the Board, the onus of establishing or laying down entirely new principles of assessment for the various units of a hospital district. That the Legislature had any such intention would seem beyond reason, yet that is what would be the result, if the Board adopted the arguments submitted on behalf of the hospital district.

A consideration of what the actual results would be for the town in this particular case, if the contention of the trustees were adopted, will at once suggest that the Legislature could not have intended to give the Board the power just referred to. If the basis of number of patients was adopted, it would mean that the hospital rate for the town would be approximately ten mills on its total assessment on both land and improvements. If the basis of the number of patient days were adopted, it would mean an eight mill rate, and on the basis of population a twelve mill rate. And if the basis of assessment were the same as adopted by municipal districts, that is on land values only, it would mean a hospital rate for the town of 19 mills, 15 mills and 23 mills, according to the basis of assessment adopted. Taking the average of the three methods of assessment just mentioned the hospital rate would be 10 mills on the total assessment or 18 mills on the land assessment, and if the basis of assessment were also taken into consideration along with these other methods it will be found that it would result in a rate of eight mills on the total assessment or nearly 16 mills on the land values alone.

Had the Town of Hanna been advised that it would be expected to contribute on such terms, it seems manifest that no agreement could have been reached. No data were at that time available which would enable the town to figure out what the adoption of a basis of hospital patients or hospital days would mean for the town, and the basis of population was manifestly not acceptable to it. It appears that the only means by which the rural and urban units could be got together and could be induced to go into a hospital scheme was to have the different units get together and agree upon their respective shares of the annual contribution. The more the Board has considered the Act, the more it is convinced that the basis adopted in the original apportionment should not be lightly disregarded in dealing with subsequent variations of the amounts apportioned to the contributing units. Circumstances, however, may change, the position of the contributing units may vary, an urban unit may increase in assessment and in population and other units may in like manner decrease. Naturally an adjustment should follow, but it must be borne in mind that what induced the contributing units to enter into the scheme originally was the fact that they were given an approximate idea of what they were expected to contribute, or the proportion which they were expected to contribute in their then state.

One phase of the question that must not be overlooked, and which suggests that at least the basis of population was not intended to be adopted in arriving at the amount of the contribution of an urban unit, is that last year it was apparently feared that in the urban municipalities there would be certain patients from these units, who, while paying an inconsiderable amount of taxes, owing to the small value of the property held by them, might receive hospital services at the minimum rate. In order to make sure that such taxpayers should not receive these services by paying merely nominal taxes, it was provided by an amendment to *The Municipal Hospitals Act*, that no such person should receive these services at the minimum rate, unless he had, prior to a date fixed by the hospital board, paid to the hospital board an amount which, together with the taxes paid, equalled the amount fixed as the annual payment with regard to persons other than hospital supporters under agreement as set out in the Act. A minimum amount of \$6 was fixed by the Act in case the hospital board should not fix any amount itself, but in this case the hospital board fixed the amount of \$10. It will be seen, therefore, that the small taxpayer in urban communities is on quite a different basis, so far as hospital services are concerned, from the rural taxpayer. The hospital tax in the rural units of this district amounts approximately to 3c per acre or \$4.80 per quarter. No urban taxpayer may receive the benefits of a hospital on the most favorable terms unless he contributes in taxes, or in taxes and to the hospital board directly, an amount of \$10, or what would be in this case slightly over the rural hospital tax upon a half section of land. In the Town of Hanna it is stated that there are but forty taxpayers who are entitled to receive hospital services at the minimum rate without coming under this provision. It can hardly be reasonably contended, therefore, that an urban unit must bear an assessment upon any such basis as suggested by the hospital district, and in addition have by far the greater number of its residents penalized so far as hospital services are concerned, unless they pay a minimum tax of \$10.

Some stress was laid upon the fact that the town benefits by having the hospital located there. It is hard to estimate the value of such a benefit if figured in the way of an increased mill rate, and it surely cannot be argued that this affords any grounds for the adoption of the various bases of taxes suggested by the district.

While the hospital district has not actually adopted any of the bases of assessment already dealt with, it seems to justify the present increase, by pointing

out that the total demand from the town is less than what the demand would amount to if figured out on any of these bases and it has thus placed this question directly in issue in this appeal. The fact is that the increase in the main falls upon the urban units, and there appears to be no question but what the contention of the hospital board is that it should have the power to disregard the original apportionment, so far as the urban units are concerned, and to make a new apportionment having in mind the various principles of assessment previously discussed. As already indicated, the Board does not believe that *The Hospitals Act* warrants any such procedure. There is nothing shown in the evidence produced which, in the Board's opinion, warrants the trustees in arbitrarily placing by far the largest share of any increase in the 1923 demand upon the town. The contention of the town that the basis of assessment should be the assessed value of the various units is no more tenable than the contentions of the hospital district, and in the Board's opinion any variation in the 1923 apportionment should always have in mind the original apportionment in 1919, more particularly where conditions have not materially changed. It may be pointed out here that there seems to be a considerable conflict in the information supplied by the hospital district and the town as to the town's population. The hospital district places the population of the town at 1,700, while the town itself estimates its population at 1,350. It would appear that in any event the population of the town is no greater than, if as great, as it was when the original scheme was put through.

Certain adjustments appear to have been made in the assessment of the rural units owing, no doubt, to a re-adjustment of the assessable acreage in these units. In making any re-distribution the Board does not wish to interfere with that re-adjustment. The amount required in 1923 over and above the estimated amount required in 1919 is \$1,405.48, and this additional amount must be raised amongst the various contributing units. The amount demanded from the town originally was \$2,688, and the proportionate share that the town should bear of the increased demand would be approximately \$152. This amount will be added to the amount of the original contribution of the town, namely \$2,688, making the demand against the town for the current year the sum of \$2,840. It appears from a perusal of the material on file that the Villages of Craigmyle and Richdale have had their apportionments raised and these amounts, not having been appealed against, will remain. These villages have had their assessments increased over the original assessment by \$123.11 in all. With the increase in the town's allotment, the total amount of the increase to be borne by the urban units will be \$275.11. The balance of the \$1,405.48, namely the amount of \$1,130.37, must be borne by the rural units in proportion to the amount of their respective assessments for the current year, and a re-division of the total amount demanded for the current year is to be made upon this basis.

As the town has succeeded in its appeal, in the main, it will be allowed its costs which will be fixed by the Board.

Dated at Edmonton, this twenty-first day of August, 1923.

BOARD OF PUBLIC UTILITY COMMISSIONERS,

(Signed) A. A. CARPENTER,

Commissioner.

IN THE MATTER OF *THE PUBLIC UTILITIES ACT, 1923*

AND IN THE MATTER OF an application by the City of Red Deer for an order of the Board of Public Utility Commissioners reducing the rates charged by the Western General Electric Company, Limited, for electric light and power and other services, and for other relief.

*Appearances:*

W. E. Payne, K.C., for the City of Red Deer, and Frank Ford, K.C., for the Company.

This is an application by the City of Red Deer for an order of the Board of Public Utility Commissioners reducing the rates charged by the Western General Electric Company, Limited, for electric light and power in the City of Red Deer, and for the reduction of other rates charged by the company, and for other relief, as set out in the application filed.

At the time fixed for the hearing, counsel for the company objected to the jurisdiction of the Board on the ground that the franchise agreement had been confirmed by an Act of the Legislature, and consequently had the effect of a statute, and was therefore beyond the jurisdiction of the Board; and further that Section 54, Subsection 2, of *The Public Utilities Act, 1923*, explicitly deprived the Board of any power it might have had to interfere with rates fixed by a contract made prior to May 1st, 1923.

The application in the present instance is in the nature of a preliminary one, for directions as to fixing the time for filing the defence, the reply, and for giving directions as to the inspection of the company's system and its books, and the Board has been urged to give its ruling upon these objections as to jurisdiction before giving any order for any directions, as asked.

The company holds its franchise for the supply of electric light and power and other services, by virtue of an agreement entered into on May 29th, 1903, between the City of Red Deer and the Western Telephone Company, Limited, this agreement being extended by further agreement dated November 23rd, 1903, the rights under these agreements having been assigned by the Western Telephone Company to the Western General Electric Company on September 8th, 1904. By Chapter 39, Statutes of Alberta, 1906, these agreements were "ratified and confirmed and declared to be binding upon the parties thereto."

It is contended by counsel for the company that the validation mentioned gives the franchise agreement statutory effect and that in accordance with the maxim "*Generalia specialibus non derogant*" the provisions of *The Public Utilities Act* do not affect the contract between the city and the company. However, in "*Northern Alberta Natural Gas Development Company Limited vs. Edmonton*" 15 Alta. L.Rs., p. 416, three out of four Appellate judges held that a statutory clause declaring a bylaw and agreement "to be in full force, authority and effect, and to be legal, valid, and binding upon the corporation," did not have the effect of giving the bylaw and agreement the status of a statute. And the Manitoba Court of Appeal in the case of "*Winnipeg vs. Winnipeg Electric Railway*" (1921 2 W.W.R., p. 282) held that a clause where a bylaw was "hereby validated and confirmed in all respects as if the city bylaw had been enacted by the Legislature of this Province" did not make the bylaw a part of the Act.

The Board is, therefore, of the opinion that the validating section in question in this matter does not give the agreements statutory effect. However, the Board thinks this particular objection might be dismissed on another ground. In 1916 the City of Red Deer obtained certain charter amendments, and amongst these amendments was the following clause: "The Western General Electric Company, Limited, shall be subject to all provisions of *The Public Utilities Act* as now or hereafter amended and any of the rules thereunder." This would appear to effectually dispose of this objection, even if the agreements had been given the force of statute by the validating clause.

The second objection is that any jurisdiction the Board may have had prior to *The Public Utilities Act* of 1923 has been ousted by the enactment of Section 54 of that Act. Clause 1 of this section gives the Board power to change the rates, tolls, or charges set out in any contract to such other greater or lesser rate, toll, or charge as the Board may deem fair or reasonable. The second clause of this section sets out that "in the case of contracts made before the first day of May, one thousand nine hundred and twenty-three, the preceding subsection shall not apply thereto except by the consent of the parties thereto duly filed with the Board prior to the hearing of the application and in the absence of a filed consent, all statutory provisions applicable, prior to the passing of this section, to such contracts and to the price to be charged for the supply of a commodity or service thereunder shall be applicable thereto." Subsection 3 of the same section sets out that "nothing in the clauses just referred to shall be deemed to involve any declaration as to the state of the law in force prior to this section coming into force."

The result of this new legislation is that while the law may be said to be clarified from now on, if the Board had jurisdiction in a matter of this nature before the 1st of July of this year, that jurisdiction is not interfered with by the enactment of Section 54. It is, therefore, necessary to consider what the law was before that date.

The provisions of the old *Public Utilities Act* dealing with the Board's jurisdiction to change rates were clause (b) of Section 20 and clause (c) of Section 23, and both of these clauses have been subsequently re-enacted in the 1923 Act. The first clause, which is now Section 53 of the 1923 Act, purports to give the Board power to "make such order respecting the improvement of the service or commodity and as to the tolls or charges demanded, as seems to it to be just and reasonable, and may disallow or change, as it thinks reasonable, any such tolls or charges as, in its opinion, are excessive, unjust or unreasonable, or unjustly discriminatory between different persons or different municipalities, but subject, however, to such of the provisions of any contract existing between the public utility and the municipality at the time such complaint is made, as the Board shall consider fair and reasonable."

Section 23 (c), now Section 63 (a) of the present Act, sets out that the Board shall have power to fix reasonable rates, tolls, etc., wherever the Board shall determine any existing rate, toll, etc., to be unjust, unreasonable, insufficient, or unjustly discriminatory or preferential. In the case of "Northern Alberta Natural Gas Development Company vs. City of Edmonton," 15 Alta. L.R., 416, the Appellate Division of the Supreme Court held that this subsection was applicable only in a case where the public utility would be free to enact or impose rates without the restriction of any contract. Although the Manitoba Court of Appeal came to a different conclusion in dealing with a similar section of *The Manitoba Public Utilities Act* in the case of "City of Winnipeg vs. Winnipeg Elec-

tric Railway Company," before referred to, the decision of the Alberta Court is binding upon this Board. In view of this decision any jurisdiction the Board may have in the present application must apparently be under Section 53 of the present Act, being the old Section 20 (b) which has already been quoted.

It was suggested in the Alberta case already referred to that the Board, in the case of a then existing contract, could not reduce the rates below what had been agreed upon in a fair and reasonable agreement, and that the Board would not derive jurisdiction simply because, at the time of the complaint, the rates provided by it might, under the then conditions, seem unfair or unreasonable. This would mean that only if the Board considered the rates unfair at the time the contract was made could it derive jurisdiction. It is suggested by the Board, however, that if that is what was intended by the Legislature, it would have been very easy for the Legislature to have so expressed itself by wording the clause in some such way as this, "subject to such of the provisions of any contract . . . as the Board shall consider to have been fair and reasonable at the making of such contract." To adopt the interpretation suggested would mean that in the present case the Board would have to hold an enquiry as to the conditions some twenty years ago, and not as to conditions existing at the present time. The Board is inclined to the view that if it finds that the provisions of the contract are unreasonable at the time of complaint it has jurisdiction under this section to make such order as is provided for in that section.

It must be remembered that in 1916 the contract was made subject to all provisions of *The Public Utilities Act*. There is set out in *The Public Utilities Act* a procedure whereby excessive rates—if not insufficient rates—may be altered. In the contract itself there is a provision for the changing of the rates set out therein by way of arbitration proceedings. Indeed, the rates now in question are not those fixed by the original contract but the rates fixed by a board of arbitrators in 1908. In the main, therefore, the Board's jurisdiction does not interfere with the contract except to change the tribunal dealing with the rates. It is true that the contract sets out the basis or principle to be observed in arriving at any such change, that is to say, the rates are never to exceed prices charged in any other town or city in the North-West Territories under similar conditions. Even assuming that the interpretation suggested in the Northern Alberta case were correct, it would appear that in the present question the Board would have power to decrease the rates, provided these rates did not exceed the prices charged in any other city, or town, as already mentioned. However, the Board does not see why the scope of this section should be narrowed down as suggested. Rather the view it is inclined to adopt is that the question as to whether the provisions of the contract are fair or reasonable is one to be arrived at from a consideration of existing conditions, and not from a consideration of conditions existing at the time the contract was entered into.

In view of what has been said the Board, therefore, is of the opinion that the objections as to the jurisdiction of the Board must fail.

Dated at Edmonton, this twenty-sixth day of September, 1923.

BOARD OF PUBLIC UTILITY COMMISSIONERS,

(Signed) A. A. CARPENTER,

Commissioner.
